

GREENPOWER

VOLUME 14 | ISSUE 3 | JULY 2011 For in-house circulation only

QUARTERLY NEWSLETTER OF BHORUKA POWER CORPORATION LIMITED

MD's MESSAGE

Dear Friend

I am happy to announce the **acquisition of a 12 MW hydro power station in Karnataka**. In the vicinity of our 9 MW Neria SHP, this project **utilizes the waters of the west-flowing Nethravathi River** and is capable of generating **30 million units**.

BPCL today Own and Operates **110 MW of hydro capacity (3rd highest in private sector** other than Tata Power and Jayaprakash Hydro) apart from 12 MW of the Wind generation.

We have ambitious plans of **delivering close to 400 million units of Green Energy this fiscal**. The current **trend of monsoon**, particularly during the month of June has been quite **encouraging**. Let us hope for the best.

With the ongoing **18 MW Kumaradhara Hydro Project** and just commenced **15 MW Chayabhagavathi Hydro** (both in Karnataka), we will be able to raise **our hydro capacity to 150 MW** in the near future. As a Company, we are **looking at 300 MW capacity** at the end of **fiscal 2012** equally shared by **Hydro and Wind**.

I am sure, as always the co-operation being extended by all stakeholders will go a long way in realizing our targets.

With best wishes

S. Chandrasekhar
Managing Director

CORPORATE NEWS

KNOW YOUR COLLEAGUE

Govind Rao H Kulkarni joined BPCL in 1998 at Rajankollur while the site was under construction. A well-qualified professional, Govind has a Master's Degree in Economics and a Diploma in Industrial Relations and Personnel Management. Encouraged by BPCL's supportive work environment, Govind has moved up the corporate ladder to the post of Sr. Officer (HR & IR) at the Shahapur Unit. A professional with commendable multi-tasking skills, he draws his capability from rich experiences in the company's Accounts, Admin., Stores, Commercial and Liaison departments. His understanding of statutory requirements for quality certifications, his capacity for striking cordial relationships with government officials and knowledge of factory related HR & IR matters has helped win him success in his career.

Govind is a happily married man with two children - Shreya and Sharad. Both kids have diverse interests and are well guided by Govind and his wife Sunanda. We wish Govind and his family the very best.

Nawab Khan joined BPCL as an Artisan, and today takes on the added responsibility of crane operations at the Shivapur plant site. Nawab Khan is a hardworking employee dedicated to this role and supports his team with maturity and competence. He is a good team player and is acknowledged by all his team members as a pleasant and helpful individual. With the crucial responsibility of handling complicated cranes, Nawab Khan is sensitive to the safety of the people and environment in which he operates. He is very careful in observing all the safety rules and keeps himself fit to handle his task with confidence.

Nawab Khan is a good husband and a doting father. Married to Gohar Jan, he has two daughters - Rahisa Banu and Shahin Banu, and two sons - Meer Ahmed Khan and Asif Khan. As the head of a big bustling family, Nawab Khan enjoys spending time at home. He is an avid reader and a cricket lover. His knowledge of the sport and its history is quite impressive. We take this opportunity to wish Nawab Khan and his family the very best.

Congratulations

- **B K Mohan**, System Administrator, Corporate Office, on being blessed with a **baby girl** on 17th June
- **Suresh B Gonal**, Engineer - Electrical, Madhavamantri, on his marriage with **Manjula** on 15th May
- **Babu N**, Engineer - Mechanical, Shivapur, on being blessed with a **baby girl** on 3rd April
- **Amudha K**, Secretary, Corporate Office, on successfully completing PG Diploma in Human Resource Development from the All India Institute of Management Studies, Chennai
- **Mohan N K**, Assistant Manager - Finance Corporate Office, on completing MBA - Finance from Periyar University, Salem

FUNNY ONE-LINERS

A big company offered \$50 for each money-saving idea submitted by its employees. First prize went to the employee who suggested the award be cut to \$25.

The Pope has the best job in the world: he has one boss only, and even him he meets after his death.

Life Insurance: A contract that keeps you poor all your life so that you can die Rich

Welcome Aboard

M Naresh, joined as Graduate Engineer - Trainee (Electrical) at Neria on 1st April.

Decade Service Award

Congratulations on completing 10 years at BPCL

- **M S Sreenivas**, VP-Finance & Co. Secretary
- **Jayasree N**, Secretary

A BPCL branded wristwatch each, was given to them for their decade service in the company.

OBITUARY

BPCL is saddened by the passing of **Mr. Basavantaraya Gouda** who worked as Helper at the Rajankollur plant. Basavantaraya expired on 5th April. We stand together in our prayers for his family to have the strength to face this irreparable loss. May his soul rest in peace.

Transfers

- **J Vijay**, Sr. Engineer (Mechanical) from Shahapur to Corporate Office (O & M)
- **Balaram R**, AE (Mechanical) from Sattigala to Madhavamantri
- **Somashekar S**, Engineer (Electrical) from Corporate Office to Shivapur
- **Ravindra K Chetti**, AE (Mechanical) from Madhavamantri to Sagar Power (Dandela)
- **Chandrashekara V**, AE (Electrical) from Sattigala to Sagar Power (Dandela)
- **Kumar Venkanna**, Engineer (Mechanical) from Shahapur to Chayadevi

A piece of useful advice

Always borrow money from a pessimist. He won't expect it back.

Harry Truman says...

A pessimist is one who makes difficulties of his opportunities and an optimist is one who makes opportunities of his difficulties.

14, APRIL

FIRE SAFETY DAY

An occasion that marks the significance of fire safety, the Fire Service Day helps create a rich awareness among all employees on the hazards of fire and the precautions to be followed. The event is

all the more consequential in a hydro power plant where fire can be a serious danger. BPCL is a company that has put 'safety first' before all else. The seriousness with which the Fire Services Day was observed on 14th April is a fitting tribute to this. Across the BPCL plant sites demos were made with fire extinguishers. Employees participated in full

strength as fire safety awareness spread among them like wild fire!

At **Rajankollur** all employees assembled to participate in the fire awareness campaign and were overjoyed with the learning during the session.

At **Dadupur** a mock drill was organized and a fire extinguisher-demo was made by the plant in charge.

Shivapur

The day was observed with the enthusiastic participation of the entire Shivapur staff.

Madhavamantri

Besides spreading fire safety awareness, the team spared a moment for the victims of the fire accident on April 14, 1944 at the Mumbai dock yard, by observing a one-minute silence.

SRD Katte

A demo was made by an engineer on the functionality of fire extinguishers. All employees, from workmen to managers were present.

A piece of history

On April 14, 1944, SS Fort Stikine, a British freighter carrying gold, cotton and explosives (bullets and bomb shells) blew up at

Victoria Docks sending half a million tonnes of rubble and debris flying across a wide radius.

The twin explosions set fires raging for three days, killed over 700 people, including several fire-fighters.

Chayadevi

All employees were present at a demo on fire extinguishers on the powerhouse premises.

BHORUKA POWER JOINS IN THE CELEBRATIONS ON

World Environment Day

World Environment Day is a global event with people across the world celebrating with colorful activities such as street rallies, city-wide walks, scientific forums, bicycle parades, green concerts, essays and poster competitions, tree plantings, as well as recycling and clean-up campaigns.

At BPCL, WED was celebrated across plant sites with many green initiatives.

1 At **Shivapur** saplings were planted.

2 **Shahapur** celebrations were held at Scheme #5 premises with the planting of 50 saplings along the approach road.

3 Employees assembled at **Rajankollur** plant site and planted saplings in the powerhouse area, as well as at the school where a small function was held in the presence of The Bank Manager, KGB, who was the Chief Guest.

At **Madhavamantri** an oath was taken by the employees to protect the Environment and to avoid using plastics.

4 Fruit saplings were planted at **Mandagere** in and around the powerhouse premises. Awareness was created among

the employees through the release of some inspiring posters.

Sweets were distributed at **SRD Katte**

5 Saplings were planted at the **Kumaradhara** plant site

At **Dadupur** saplings were planted in and around the powerhouse premises and speeches were made on environmental safety.

6 At **Manjanadaka** cute saplings were planted to mark the occasion and there was a festive spirit all over.

At **Sattegala** the day was celebrated with a list of awareness programmes. 125 saplings were planted and all plans are on to plant at least 500 saplings in the coming year. An oath was taken by the participants to protect the trees with utmost care.

5, JUNE

Quality Quotient | AN UPDATE IN THE ISO LEAGUE FOR GLOBAL EXCELLENCE

The Re-certification Audit at Madhavamantri

ISO 9001:2008 QUALITY MANAGEMENT SYSTEM

■ **ISO 9001:2008 Re-certification work** has been completed by May. **M/s. International Certification Services (ICS)** conducted the necessary audits and made a recommendation for certification. **The scope covered all 12 plants including Dadupur and Corporate Office.** The certificate will be **valid for 3 years up to May 2014.**

■ A **3-day Awareness and Internal Audit Training Programme** by an external party was arranged for the **Dadupur** plant site.

ISO 14001:2004 OHSAS 18001:2007

ENVIRONMENT, HEALTH AND
SAFETY MANAGEMENT SYSTEM

■ **Monthly Safety Committee Reports** have been received regularly from all stations as part of the monthly performance report. No major incidents have been noted.

■ **BPCL Safety manual** has been revised and issued to all plants. Key personnel at all the plants were interviewed on safety aspects. **Competence certificates** were given to those who passed the interview.

ISO 26000:2010

GUIDANCE ON SOCIAL
RESPONSIBILITY

■ **7 committees** were formed to attend to the core subjects of the standard. There are a total 50 members in the committees involving all 12 stations and Corporate Office.

■ The following additional committees were formed in the Corporate Office to get effective control of the subjects.

- 1 Occupational Health and Safety Committee
- 2 Grievance Committee
- 3 Central Committee with the team leaders of all Committees.

■ The social responsibility is well understood by the committee members and documentation work is in progress. 60% of the work is completed.

■ The core subjects addressed are **Organizational Governance, Human Rights, Labour Practices, Care for the Environment, Fair Operating Practices, Consumer Issues, Community Involvement and Development.**

■ There are separate committees for each subject.

■ The Central Committee will control the total system.

■ The main objective of **SR** - contribute to **sustainable developments.**

Give to every
human being every right
that you claim for yourself.
ROBERT INGERSOLL

Capability Booster TRAINING IN BPCL THIS QUARTER

▲ Training on Time Management and Prioritization; and Stress Management, at Mangalore

■ **WindPRO Advance Course:** The programme was attended by **D Chandrashekar, Manager - Mechanical**, on 24th and 25 March at Seoul, South Korea.

■ **Workshops on - (a) Time Management and Prioritization (b) Stress Management:** The workshops were conducted by **M/s. HR Cornucopia Pvt Ltd., Bangalore**, at Mangalore on 2nd May. **All staff members from Neria, SRD Katte, Shivapur, Manjanadaka, Sattegala, Mandagere, Madhavamantri and Kumaradhara** attended the programme.

■ **Conference on Mergers and Acquisitions - Growth and Value Creation through M&A:** The conference was organized by **M/s. Confederation**

of Indian Industry, Bangalore, on 27th May and attended by **R Harish, Assistant Manager (Co.Secretary).**

■ **One-day seminar FACEAL Opportunities:** The seminar was conducted by Bangalore Chapter of the ICSI on 4th June and attended by **M S Sreenivas, GM (Fin.) / Co.Secretary** and **R Harish, Assistant Manager (Co.Secretary)**

■ **Green Power 2011: International Conference cum Exposition on Renewable Energy:** The 2-day conference was organized on 7 & 8 June, 2011 by Confederation of Indian Industry and attended by **K Ramadas Kamath, GM (Technical)** and **BM Shashidhar, GM (Civil)**

PROJECTS

Kumaradhara

Mini Hydel Project - 3x6 MW

The 3 x 6 MW Kumaradhara project site is looking in great shape as it rolls on towards completion. Progress is being made steadily and surely on various fronts.

▲ Team from TCE touring the excavated area

ELECTRICAL

The Private Land Revenue survey of the 33kv transmission line, excluding nine parties, has been completed.

CIVIL

During the last quarter, the team from M/s RCL focused primarily on work in the powerhouse area, since this comes in the critical path in the workflow.

- 4000 cum of hard rock excavation has been completed in the power canal bridge area. An impressive progress has been made from EL 56.50 to 53.00, against a final EL 29.00.
- Hard rock excavation of 20,000 cum has been completed in the powerhouse area, from downstream portal to the TRC, taking the level to EL 37.00 as against the final EL 22.716.
- The Tunnel D/s portal excavation has been completed up to EL 30.00 as against EL 29.00.

HAPPENINGS

A borewell has been drilled and a submersible pump with a water pipe line has been installed in the power canal premises in an effort to facilitate school children with clean drinking water.

A team of consultants with expertise in blasting technology, from M/s TCE visited the Kumaradhara project site on 4th and 25th May, and again on 9th June to review the location for the tunnel portal work.

SHIVAPUR | SHAHAPUR | RAJANKOLLUR | SRD KATTE | MADHAVAMANTRI | MANDAGERE | CHAYADEVI | SUGUR | MANJANADAKA | DADUPUR | SATTEGALA | NERIA

SHIVAPUR HYDEL PLANT

GENERATION PEAKS

Shivapur never fails to impress us with its power generation. The plant achieved a generation figure of 8323.00 Mwh till date, overshooting the previous year's figure of 3787.00 Mwh by a clear margin of 4536 Mwh.

CANAL CLOSURE

The usual canal closure work has been started from 27th April. All engineers and workmen are speeding up on the various schedules to accomplish all tasks well before time. Over 70% of the work has already been completed by this bustling team of enthusiasts.

▲ Annual maintenance work under progress

▲ Sr. VP (Technical) is taken around the control room

VISITOR

Sr. V.P (Technical) paid a visit to the Shivapur site to review the progress of the shutdown work on 18th May. He went around the plant holding discussions with the various teams.

A business that makes nothing but money is a poor business.

HENRY FORD

EXCLUSIVE
SHIVAPUR SPECIAL REPORT
KOLLUR VILLAGE

The Hon'ble Chief Minister of Karnataka, Sri. B S Yeddyurappa looks on as Shri. Siddhartha Agarwal hands over papers. Shri. A M Naganna is also seen

KOLLUR VILLAGE

The construction of the 113 houses at Kollur Village held our attention for the past months as we reached out to the victims of the recent devastating floods. It was indeed a great pleasure to host a function for handing over the keys to the flood affected people. The Hon'ble Chief Minister of Karnataka, Sri. B S Yeddyurappa graced the occasion as Chief Guest and did the honors in handing over the keys. Sri Siddhartha Agarwal and Sri. A M Naganna were felicitated on this momentous occasion.

A view of the rehabilitated Kollur Village

RAJANKOLLUR HYDEL PLANT

ANNUAL MAINTENANCE

Rajankollur's Annual Maintenance rigor began with a meticulous department-wise listing of duties. All teams are pursuing the tasks in their area of work with much enthusiasm and competitive spirit to get ahead with early completion of the tasks.

POWER BREAK!

There has been frequent interruptions in the 33 KV supply which comes to us from the 110/33KV Shorapur Station through the GESCOM Station at Hunasagi. For a period of time, the line was tapped and the power supply was being directed to the new 33/11KV Station at Ammapur. We made several requests to the authorities. A concerted effort was made in this

by the BPCL team before the supply was disconnected and the tapping ceased. The KPTCL and GESCOM authorities requested the assistance of our expertise and skills in ensuring line-maintenance from Shorapur to Hunasagi to avoid the 33 KV line interruptions. Our team was quick to respond and this involvement is bound to improve our plant generation.

▲ Team engrossed in maintenance work

▲ Children enjoy the park at the school

■ BHORUKA SCHOOL, RAJANKOLLUR

With the commencement of the new academic year, the children of The Bhoruka School, have been treated to the pleasure of a Children's Park. The park is aimed at increasing the sports activities besides upgrading the school facilities and appearance.

MANDAGERE | HYDEL PLANT

■ ANNUAL MAINTENANCE

All maintenance work on the electrical and mechanical fronts has been completed and the machines are all set for power generation.

■ HEAD RACE CANAL WORK

The Mandagere team set out to clean the HRC with a meticulous plan for muck removal and de-siltation. In a week's time the energetic team removed 5,000 cum of hard rock with the help of earth movers. The de-siltation work from 0.00KM to 1.1 KM was completed in the canal. Load testing was done with one machine and the output was 1.7MW as against a previous maximum output of 1.5 MW.

SHAHAPUR | HYDEL PLANT

▲ Generator maintenance work underway

▲ Certificate of Merit being received for 5S

■ POWER

At Shahapur, the generation for the financial year 2010-11 is 22.88 MU. This includes D9 with the break-up being - SMHS-19.615 MU & D9 - 3.265 MU. The plant generated 3.861 MU more than last year. This achievement can be attributed to many factors. Firstly, the area was blessed with good monsoon. Then, there was good coordination between the BPCL team and the Irrigation Department. The canal work and the gate work was within our reach which made it easier for us to work quickly.

■ ANNUAL MAINTENANCE

The list of tasks scheduled during the Annual Maintenance has been taken up vigorously. All work has been completed in schemes 1, 2, 4 and 5. Work at scheme #3 and D9 is making steady progress and is fast heading towards completion.

In scheme #2, there was a hissing sound with sparks emanating from the bus chamber of the 11 Kv switch gear panel. The noise and sparks penetrated the tube and supporting insulators.

area, after leveling it, in front of raft for additional trash rack units.

Cobble stone paving from the main entrance to both connecting doors of the store has been completed.

■ ISO - QUALITY MANAGEMENT

A Safety Audit was conducted at site on 6th April, by Mr. Gopala Krishna and Mr. Venkatesh from M/s. NSC.

■ IN THE LEGAL QUARTERS

Stack monitoring and air quality monitoring was carried out at site on 2nd May. Water sample testing was carried out as per norms. All statutory requirements are being meticulously followed.

IT IS THE LITTLE THINGS THAT MAKE A BIG DIFFERENCE

There was a man taking a morning walk at or the beach. He saw that along with the morning tide came hundreds of starfish and when the tide receded, they were left behind and with the morning sun rays, they would die. The tide was fresh and the starfish were alive. The man took a few steps, picked one and threw it into the water. He did that repeatedly. Right behind him there was another person who couldn't understand what this

▲ The Labour Department team visiting the site

This irregularity was attributed to the moisture that accumulated inside the chamber. The team from M/s. Siemens attending to the problem recommended the replacement of all the breaker penetrating tubes, bus supporting insulators and fasteners.

In scheme #3, new 700 AH battery bank has been commissioned. The performance of the battery bank has been found satisfactory. It is truly gratifying to note that we have been able to save a 'service engineer charge' of Rs. 50,000/- with our decision to charge the battery bank in-house.

In scheme #4, soil-slides from the raised area resulted in the need for boulder removal which has been completed. Foundation excavation and construction work on the RRM retaining wall has also been completed.

■ VISITOR

A team of professionals from the Labor Department, including the Labor Commissioner, Labor Officer and Labor Inspector visited the plant on 21st April. The team went about scrutinizing and verifying all records as per "The Contract Employees R & A - Act 1970" and other applicable laws. They were satisfied and appreciated the compliances maintained by the plant.

■ 5S SYSTEM

CII Chennai sent a team on 19th February to conduct the 5 S System Audit. Mr. Mukundan and Mr. Sachin Jain comprising the audit team were highly appreciative of the system. We have been awarded a "Certification of Merit" by CII Chennai.

MADHAVAMANTRI | HYDEL PLANT

▲ NSC team during the Safety Audit

■ ANNUAL MAINTENANCE

The team at Madhavamantri seem to be pacing ahead of everyone with the annual maintenance schedule. Work at all departments have been completed with some major accomplishments.

Intake Pond supporting wall on the flow left side: Fresh PCC concrete was laid on the eroded portion of supporting wall and the system has been normalized.

Front portion of raft for additional trash rack units: PCC concrete has been laid on the entire

Food for thought KEEP YOUR EYES UPON THE GOAL

On July 4, 1952, Florence Chadwick was on her way to becoming the first woman to swim the Catalina Channel. She had already conquered the English Channel. The world was watching. Chadwick fought the dense fog, bone-chilling cold and many times, the sharks. She was striving to reach the shore but every time she looked through her goggles, all she could see was the dense fog. Unable to see the shore, she gave up. Chadwick was disappointed when she found out that she was only half a mile from the coast. She quit, not because she was a quitter but because her goal was not in sight anywhere. The elements didn't stop her. She said, "I'm not making excuses. If only I had seen the land, I could have made it." Two months later, she went back and swam the Catalina Channel. This time, in spite of the bad weather, she had her goal in mind and not only accomplished it but beat the men's record by two hours.

man was doing. He caught up with him and asked, "What are you doing? There are hundreds of starfish. How many can you help? What difference does it make?" This man did not reply, took two more steps, picked up another one, threw it into the water, and said, "It makes a difference to this one." **What difference are we making? Big or small, it does not matter. If everyone made a small difference, we'd end up with a big difference, wouldn't we?**

DADUPUR | HYDEL PLANT

DADUPUR'S FIRST YEAR

The Dadupur plant site was a picture of fun and excitement as all team members joined together to celebrate the First Anniversary of the plant site on 19th March. A Sri Sathyanarayana Pooja was performed at the powerhouse and the day was marked by sporting events for the employees. Executive Engineer from the Irrigation Department was invited to be the Chief Guest at a function organized. Prizes were distributed to the winners in the sporting events.

MAINTENANCE WORKS

The bustle of the annual maintenance schedule caught up with the Dadupur team as all departments geared up to finish the long list of annual checks in a systematic manner as per BPCL standard formats. In addition to this, major repair work on unit 4 turbine shaft and assembly work has been completed on all fronts, including oil filtration of transformers. Machines are all set for power generation.

HEAD WATER LEVEL PROTECTION WORK

As directed by the Irrigation Department, power generation was stopped on 19th April to carry

▲ Anniversary Day Pooja

out the head water levels protection work on SOMB River banks. The list of tasks included positioning boulders in wire crates, pitching work and formation of embankments on the slope. All tasks have been completed in all respects in a planned manner, on time before the power generation was restored.

SAFETY AUDIT

The Safety Audit was carried out on 7th and 8th June by an expert team from NSC. The team was truly delighted with the safety standards maintained by the Dadupur team and were highly appreciative of the team's competence in meeting all requirements desired by the NSC team. The auditing professionals made a few suggestions which BPCL is happy to receive and will implement shortly.

SATTEGALA | HYDEL PLANT

POWER GENERATION

An up-trend generation was maintained during the entire financial year by the Sattogala plant. The total generation for the year 2010-11 was 25.96 MU as against 23.92 MU last year. Great show team. Keep it up!

FLOOD GATE MODIFICATION

The Flood gates have been modified according to our requirement. Additional counter weights have been provided on the gates. Casted counter weights were transported to left bank through metal boats and lifted and installed with the help of pulleys.

ANNUAL MAINTENANCE

Annual maintenance work on all four units have been completed and machine availability for the next canal year has been ensured.

Civil: Leak proof concreting has been provided on control room slab as preparatory work for false ceiling in control room.

Nappy concreting has been provided on the remaining portion of the weir which is essential to ensure head race level is at 616.30 after completion of gate modification works.

Safety measures

To ensure a safe working place during flood or fire, BPCL team has put together certain safety rules which the plant sites adhere to:

- Hand railing on flood protection wall has been installed
- Extra fire extinguishers have been provided for the 66 KV switch yard and turbine floor

SOCIAL RESPONSIBILITY

The Sattogala team reached out to help clear the trash and weeds accumulated at "sopanams" at three locations in the Sattogala village range. At one location on the left bank the clearing effort was in response to the request of the locals who were delighted with BPCL's social responsibility.

▲ Slab concrete being laid

SRD KATTE | HYDEL PLANT

WORK SCHEDULE

Major tasks were completed in unit #1 which included, overhaul of turbine, replacement of seals, repairs of control tubes and new rigid coupling through a contractor.

NOBLE GESTURE

A small class room was constructed by the team for the Government Primary School located in the vicinity of the plant site.

VISITING TEAM

A team comprising VP (Operations) and DGM (Projects) visited the plant site to inspect the overhaul task of the turbine in unit #1.

Mr. Narendra Babu, Sr. Factory Inspectorate, Mysore, visited the site to scrutinize our reports on tools and tackles, sound level in the power house vicinity and acoustic enclosure.

SUGUR | HYDEL PLANT

The high points of the Sugur for this quarter have been the annual maintenance work schedules. The work began on 27th April and has made impressive progress in a short span.

CIVIL

- Soil bund has been provided on the intake upstream and at the tail race canal.
- The weir has been dismantled for a length of 9 m to avoid overflow on bund.
- Grouting has been completed at all 3 units.
- RRM wall has been constructed at flow right of tail pond for 15 m to avoid rock slipping.
- RRM wall construction is in progress at flow right of intake for a length of 20 m.
- Plum concreting is in progress on exposed part of the foundation retaining wall.

MECHANICAL

- G.V Cleaning and Epoxy Painting has been completed
- Trash rack elements have been painted.

ELECTRICAL

On the HRC and TRC sides, 10HP and 7.5 HP motors have been fitted. In the dewatering pit 30HP and 20HP motors have been installed. The motors facilitate a trouble-free dewatering system.

CHAYADEVI | HYDEL PLANT

ANNUAL MAINTENANCE

Like in all other plants, the team at Chayadevi, set out on a long list of annual maintenance work, which has been completed on time as per schedule. The machines have been restored in unit #1 on 27th April and unit #2 on 8th March.

The exposed penstock pipes at DT gallery, of around 600 mm width from u/s RCC wall, has been protected against rust formation with the welding of an extra MS collar plate over the penstock by M/s MAR Fabricators, Hospet.

Gauzing has been carried out for the runner blades and cones of both the units to protect them against pitting formation. The assignment was carried out by a team of experts from M/s L&T WPB Bangalore.

Light travels faster than sound. This is why some people appear bright until you hear them speak.

Do not argue with an idiot. He will drag you down to his level and beat you with experience.

Knowledge is knowing a tomato is a fruit; Wisdom is not putting it in a fruit salad.

Children: You spend the first 2 years of their life teaching them to walk and talk. Then you spend the next 16 years telling them to sit down and shut-up.

MANJANADAKA HYDEL PLANT

▲ The freshly painted powerhouse

GENERATION

On 3rd June, a formal Ganga Pooja was performed soon after water was received at the intake pond. Both machines were re-started one after the other after pre-checks were carried out.

VISITS

GM (Civil) and Chief of M/s. TCE, Bangalore visited the plant site on 13th April to review the powerhouse, post project realization into a full-fledged operating station. The team held discussions on strengthening the power canal and weir works.

The Deputy Chief Electrical Inspector from Mysore and Electrical Inspector from Hassan visited our site on 26th April as part of their periodical annual inspection of electrical installations.

Sr. Environmental Officer and Environmental Officer along with their team from the Karnataka State Pollution Control Board, Mysore, visited the site on 14th April. The team verified all issues concerned with the air and water consent norms for the operation of the plant.

A team of engineering students along with staff from New Horizon College, Bangalore, visited the plant site to have a first-hand understanding of the functioning of a mini-hydro power plant.

ANNUAL MAINTENANCE

Electro-mechanical:

All maintenance work on the electro-mechanical front has been completed on time and the machines are all set for re-starting.

- TG, the switchyard equipment and fencing has been freshly painted.
- Defective guide vane seals in both the machines have been replaced with new ones by M/s. Jyoti Ltd.
- New sound proof "Acoustic box" for 25KVA DG set at zero point weir gate has been installed.

Civil:

On the civil front the following major works that were planned this year were completed well in time.

- Construction of CD-2 new diversion weir, apron concreting at weir bottom, painting of powerhouse and control room, construction of powerhouse drain, storm water drain, repair of existing drain, construction of main entrance gate, etc. were completed.
- Construction of the main entrance gate with compound walls on both sides has added to the world-class appearance of the powerhouse.
- One of the major streams, CD-2, has been reconnected to power canal with a diversion

weir to improve the generation figure. The diversion weir regulates the gate and road culverts for vehicular movement.

- Apron concrete for the main diversion weir toe has been taken up and is nearing completion in the critical eroded portion.
- The powerhouse has been beautifully painted on the exterior as well as the interior. The plant is located in the lush green belt of the Western Ghats. Set in such a scenic location, neatness and class of the plant is essential to complement the picturesque environment.
- Nearly 163 meters of plastering on the power canal side lining has been completed on flow left side.
- One of the sluice gates at weir location, which was non-operative was promptly attended to by our team of engineers and workers who rectified the problem in record time to make the gates operative again.

NOBLE CAUSE

BPCL was highly forthcoming in contributing a sum of **Rs. 50,000/-** to the Local Farmers Co-operative Society at Karike Village during the inaugural function of the new building during their Silver Jubilee Function. BPCL has always believed in establishing a good relationship with the local community at all its plant sites, by reaching out to the local folk at opportune times.

▲ Ganga Pooja being performed

▲ Engineering students listened with rapt attention

HOW WOULD YOU LIKE TO BE REMEMBERED?

About a hundred years ago, a man looked at the morning newspaper and to his surprise and horror, read his name in the obituary column. The news papers had reported the death of the wrong person by mistake. His first response was shock. Am I here or there? When he regained his composure, his second thought was to find out what people had said about him. The obituary read, "Dynamite King Dies." And also "He was the merchant of death." This man was the inventor of dynamite and when he read the words "merchant of death," he asked himself a question, "Is this how I am going to be remembered?" He got in touch with his feelings and decided that this was not the way he wanted to be remembered. From that day on, he started working toward peace. His name was Alfred Nobel and he is remembered today by the great Nobel Prize.

LAST LAUGH

An elderly woman went to her local doctor's office and asked to speak with her doctor. When the receptionist asked why she was there, she replied, "I'd like to have some birth control pills." Taken aback, the doctor thought for a minute and then said, "Excuse me, Mrs. Glenwood, but you're 80 years old. What would you possibly need birth control pills for?" The woman replied, "They help me sleep better." The doctor considered this for a second, and continued... "How in the world do birth control pills help you sleep?" The woman said, "I put them in my granddaughter's orange juice, and I sleep better at night."
